AVEO[®]
THE SOLUTION SYSTEM

INQUE Group

INQUE Group

INQUE was born to provide Kitchen hardware solutions in Mumbai, India. Today, we are also providers of shutters and cabinetry. For us, providing the best customer service, customer experience and company culture is of utmost importance.

INQUE is a homegrown brand with its established, experienced and esteemed roots founded by a family that created ENOX.

A firm foundation for Pooja Hardware Pvt. Ltd. was laid down in the year 2007 with the brand ENOX with its product portfolio comprising Glass hardware, sliding solutions, door control, furniture fittings and kitchen hardware.

With time being grateful, our hard work helped us reach a commendable milestone of sales volume which progressively increased year on year.

In the year 2014, A Swedish multinational company named ASSA ABLOY acquired ENOX, with the branch of business that deals in locks and hardware. At that time, we were the market leader employing 220 passionate employees in our team. Since, the Kitchen Hardware business was not acquired from our product portfolio, we decided to continue our Kitchen Hardware under the INQUE brand with Pooja Hardware.

To take INQUE to a different height, we have started a new company named Inque Solution LLP. Inque Group of companies have acquired multiple brands, out of which AVEO Hardware India Pvt. Ltd. is one of its prized possessions.

Successful companies don't just happen. Success requires nurturing, years after year to assure that customer expectations are not only met, but are also exceeded.

HISTORY

At AVEO, we trace our beginning back to 2008, the year Mr. Ashish Shah laid the base of our company in Mumbai, India. To introduce our founding member, Mr. Ashish Shah with a handful of experience in retail hardware stores, started a wholesale trading firm in Architectural Hardware. Later on, in the year 2015, he laid a firm foundation of AVEO HARDWARE under the brand name AVEO. Thereafter, equipped with his experience and expertise, in the year 2021, with an ambition to take AVEO to great heights, a marginal stake of Aveo Hardware was passed over to INQUE Group of Companies. With this acquisition was born the Aveo Hardware India Pvt. Ltd., under the leadership of Mr. Ashish Shah, Mr. Divyesh Shah and Ms. Komal Shah falling under the INQUE group of companies

WHAT WE DO

At Aveo Hardware India Pvt. Ltd., we intend to inspire the world by showing it's possible to deliver happiness to customers, employees, vendors, shareholders, and the community simultaneously in a long term and sustainable way by providing exceptional quality hardware.

AVEO product palette consists of Glass Hardware, Sliding solutions, Furniture fittings and Door automations.

We aim to make lives easier and convenient with our hardware being smart and functional at the same time. With their extensive experience in the Hardware industry, our founders timely understood the peculiarities of the market and its needs. Our Product palette is designed and drafted very meticulously to cater to a variety of requirements and choices. Our team is a bunch of passionate people who are updated with the international market and work hard to introduce the latest products in India.

VISION

To be the synonym for Architectural Hardware in India and globally.

PVD (physical vapor deposition) coating, also known as thin-film coating is an acronym that's increasingly prevalent in metalwork-finishing parlance and is generally associated with scratch-resistance and coloring benefits.

But Why Pvd ?

SUPERIOR WEAR RESISTANCE, SUPERIOR CORROSION RESISTANCE, SUPERIOR CHEMICAL RESISTANCE

You will appreciate your product more when it's harder and more wear & corrosion resistant.

But HOW?

The answer to this comes with the PVD coatings which gives significant result when applied in place of electroplating process.

To list few of the distinctive features, PVD:

- Allows for thin coatings (less than one micro-meter) and sharp edges.
- Is remarkably versatile in terms of the sectors and products where it can be used with its presence as a replacement for the most traditional painted and electroplated decorative-metalwork finishes. Its job when it comes to coating chrome-plated materials and stainless steel is noteworthy giving the surface type of the chosen material a distinguish look along with the colour of the finish which does not chip, tarnish or fade.
- Is more environment friendly than electroplating, as the process is free from any toxic chemical solutions to be disposed of at the end.
- Comes with assurance of superior wear resistance, corrosion resistance, chemical resistance, with low factor of friction and excellent adhesion. Along with this, is its commendable performance when it comes to brilliant decorative finish, high hardness, uniform coating simultaneously with low maintenance.
- reduce friction and provide a barrier against damage.
- Involves high cost along with the complex machines and skilled operators.

Whether the coating needs to be extremely thin, pure, durable or clean, PVD provides the solution.

PVD Coating refers to a variety of thin film deposition techniques where a solid material is vaporized in a vacuum environment and deposited on substrates as a pure material or alloy composition coating eventually providing crucial performance attributes for the final product

Auto Hinges

The number of hinges needed for each door depends on the width of the door, the height of the door and the type of material the door is made of. It varies in particular practices. The hinge installation proposal listed on the right is only for your reference. Experiment is suggested in an uncertain situation.

If in doubt, It is advisable to produce a trial mounting or to increase the number of hinges.

For reasons of stability, distance X between the hinges must always be made as large as possible.
